06	Tell your parents/teachers if you are being bullied online	Respect your parents' rules about Internet usage	BONUS		Do not download attachments from unknown sources	BONUS

A SAFETY NET

Players: 2 to 4

Required: Two Dice, One coin/counter for each player

Game board: This is your computer and is divided into six rows and columns. The idea is to help children learn the “Do’s and Don’ts” of using the Internet. The Do’s are given in the green boxes and the Don’ts are in the red boxes. On the top and left are numbers 1 to 6 to identify each single row and column, horizontally and vertically.

Yellow Bar: This has four spaces with illustrations on either side of Start. The left denotes carelessness and risk-taking while browsing. The right side shows that you are using the Internet to learn and do daily activities properly.

How to play:

- The youngest player starts. Take turns in a clockwise direction.
- Place all the coins/counters on 'Start' as shown on the game board. The coins/counters move only on either sides of the Yellow bar.
- Roll the dice together. Of the numbers that fall, one should be matched to the horizontal row and the other to the vertical row.
- Locate the intersection of these two numbers and see what you have:
 - Blank space: nothing happens
 - Bonus: roll the dice again. Denotes safe browsing
 - Lose: Miss your next turn. Indicates you are taking risks.
 - Red box: Read the content and move your coin/counter to the left by one space on the Yellow Bar.
 - Green box: Read the content and move your coin/counter to the right on the Yellow Bar.
- During play the coins/counters move from left to right side or from right to left side by a single space. Do not place the coins/counters on 'Start'.
- Keep playing to learn tips to safely browse the Internet, whether on the desktop/laptop, mobile or tablet in the real world.
- The player who lands on 'Trapped' is out of the game.

Winner: The first player to reach the space marked 'Safe'.
