

WORLD OCEAN POLLUTION PROBLEM

environmental infographic in isometry

29.2% land 70.8% ocean — 361,132,000 km²

GARBAGE PATCHES MAP

80% of garbage falls into the ocean from the coast

tankers and ships accident

2% of the ocean surface is covered with oil film

birds die in oil slicks

animals suffer from plastic and polyethylene

overfishing

18% dirty waste from factories and cities

3.5 - 6 million tonnes of oil annually falls into the world ocean

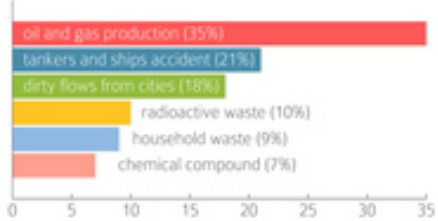

8,000,000 TONNES OF PLASTIC

enter the ocean each year

some species of animals and fish disappear

WORLD OCEANS DAY June 8

OCEAN POLLUTION sources

TOP 8 GARBAGE in the ocean

PROBLEM SOLVING

improvement of oil production and transportation

carbon dioxide concentration decrease

ecological fuel using

waste processing plants

alternative energy development
