**GO FOR GOLD!**

Caramel and honey full of delight

The shimmering sand in the desert sunlight

Gold are the treasures that sparkle and gleam

So is the medal in every athlete's dream

**DID YOU KNOW?**

- Gold is a noble metal because it does not rust or lose its shine.
- The symbol for gold is Au. It comes from the Latin aurum, which means shining dawn or glow of sunrise.
- Gold is beaten into a thin thread called zari and is used in traditional embroidery in South Asia.
- Thin flakes of gold are also used in food items such as sushi, chocolate, burgers and others.
- Ancient civilisations connected gold with the sun. Royalty and nobility wore it as a symbol of power and authority.
